A message from us...

It's hard to believe since we sent our last newsletter out all of the devastation that has taken place around the world – in particular Christchurch which undoubtedly has touched the hearts of all of us. As a company we were able to assist with the help of one of our suppliers by providing containers of Purell hand sanitiser to the rescue workers who were working under extreme conditions and selflessly gave of their time. Several of our childcare centres within Christchurch were affected and we were able to offer financial help to these centres.

With the government funding cuts taking place Hygiene House are mindful of this and please contact us if you are concerned about your centre outgoings. We will work with you to try and help you save money. On this note please come and see us at the ECC Conference in Wellington if you're there – we would love to see you.

Heres to the remainder of 2011 and Mother Earth being in a better mood!

**Win one of 10
double passes to
the movies!**

- Spend \$350.00 or over excl gst online before 31st August 2011
- Select the correct promotion upon checkout and you will go in the draw to win these fantastic movies passes!

ORDER DELIVERIES

Just a friendly reminder when you receive your order via our couriers, please check the numbers of ties that you should be receiving before signing for the goods – this way if something is missing it is easier to track.

New wet wipes are here!

80 wipes per pack, 12 packs per ctn
\$2.49 per pack, \$29.00 per carton

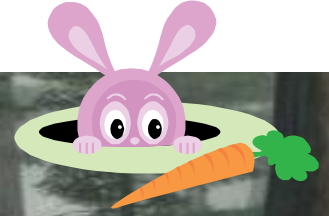

2,000

The approximate number of kilojoules you burn by walking 10,000 steps (about 8 km)

With winter upon us consider our touch free Purell dispenser – this is great in reception areas and prevents cross contamination as it is hands free. Call us on 0508 494 436 for more info.

Property Managers, take a peek....

HygieneHouse

Earth Renewable cleaning products are 100% biodegradable. They are safe for all animal life, aquatic life and plant life. Every ingredient used is renewable and comes from an environmentally sustainable botanical source. All Earth Renewable products are concentrated, which minimises the amount of fossil fuels consumed to transport and also reduces the packaging. This range carries Good Environmental Choice Australia certification.

Glass Cleaner – a highly concentrated glass & surface cleaner.

Heavy Duty Degreaser – a non toxic heavy duty cleaner with no caustic fumes. Contains a unique soy based solvent for powerful cleaning.

Multi Purpose Cleaner – a concentrated non-phosphate, non-abrasive cleaner composed of water soluble cleaning agents.

Neutral Floor Cleaner – pH neutral floor & hard surface cleaner.

Bathroom Cleaner – chlorine, bleach & ammonia free with a unique botanical ingredient that acts a long lasting non-stick film to prevent re-soiling.

If you are interested please contact Alan, Bruce or Tina

New, improved non-toxic Solo Cleaning System

Our Solo range of products (most of you will be familiar with our Germex and Mops, the red and yellow liquids) will be available in new packaging from the end of August.

The concentrates will now be supplied in 750ml bottles, instead of sachets. The bottles come with 4ml pumps that screw directly on, and these are used to pump product into the spray bottles for cleaning.

This new packaging has eliminated the need for a 5 litre pump bottle, meaning more storage space and less steps involved in mixing the chemicals.

As soon as the new packaged range is available (end of August) we will advise all customers – in the mean time we will continue to supply the usual sachets that everyone is used to.
